

2024 Webinar Series

ICYMI: BPNG Sessions at BAPEN 2023

Managing medication in patients with enteral feeding tubes and in the surgical patient

This webinar provides another opportunity to hear from experts in the management of medication in patients with challenging enteral access.

Emma Wilkinson will provide an update on medication administration in paediatric and adult patients with enteral feeding tubes. Robbie Cord will discuss the challenges of medication management in the surgical patient.

The background to the US FDA mandate on AI levels will be discussed and experiences of US Nutrition Support Teams in meeting the established AI limits will be shared.

This webinar share key consideration and provide an opportunity to ask the experts.

14th May
